PROFESSIONAL SUMMARY

Full-Stack Software Developer with 3+ years of experience building high-performance web applications, RESTful APIs, and cloud-deployed microservices. Consistently delivered performance improvements of 35–60% across React/Node.js/PostgreSQL stacks. Experienced with AWS, Docker, Kubernetes, CI/CD pipelines, and Agile methodologies.

TECHNICAL SKILLS

Languages: JavaScript, Java, SQL

Frontend: ReactJS, React Native, Redux

Backend: Node.js, Express.js, Spring Boot

Databases: PostgreSQL

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, GitLab CI/CD

AI & APIs: Claude AI (Generative AI), NSE API Integration

Security: JWT Authentication, RBAC, HTTPS Encryption

Methodologies: Agile, Microservices, RESTful API Design

WORK EXPERIENCE

Associate Software Developer | DeccanLogic PVT LTD

May 2024 – Present

- Designed and delivered a responsive digital investment platform enabling 10,000+ retail investors to execute mutual fund transactions via NSE API integration.
- Engineered cross-platform UIs using React.js, React Native, and Redux, improving application performance by 35%.
- Streamlined SIP, lump sum, and SWP investment workflows, reducing average transaction execution time by 30%.
- Implemented Jenkins CI/CD pipelines within an Agile/GitLab environment, cutting build/test/deploy time by 60%.
- Built production-grade RESTful APIs using Node.js, Express.js, and PostgreSQL; optimized queries to handle millions of records and improve response times by 40%.
- Architected enterprise-grade security with JWT authentication, RBAC, and HTTPS encryption.
- Containerized backend services with Docker and deployed on AWS, improving scalability by 60% and reducing infrastructure downtime by 35%.

Associate Software Developer | DeccanLogic PVT LTD (Evolvus)

Nov 2024 – Mar 2025

- Designed a web interface for capturing and validating complex biological data (proteins and carbohydrates), improving input accuracy and usability for scientific and laboratory teams.
- Created robust web applications backed by RESTful APIs, establishing reliable and maintainable front-end/back-end communication patterns.
- Integrated 15+ Spring Boot microservices with Kafka to enable asynchronous communication, achieving 99.99% system uptime.

Associate Tinker Trainer | Stem Learning PVT LTD

Oct 2022 – Aug 2023

- Developed and maintained RESTful APIs using Java and Spring Boot for IoT applications spanning drone control systems and sensor-based automation.

PROJECTS

Advisory Investment Platform (2024)

- Built a full-stack mutual fund advisory web app with NSE API integration, handling 100+ daily transactions with robust JWT-based authentication and RBAC access controls.

- Improved platform user base by 30% within six months through UX enhancements and streamlined investor journeys.

Evolvus Biological Data Management System (2024)

- Developed a research-focused web application for managing protein and carbohydrate structural data, enforcing precision and consistency across scientific and laboratory workflows.
- Orchestrated event-driven data pipelines across 15+ Spring Boot microservices using Kafka, ensuring consistent data flow and fault-tolerant processing throughout the system.

EDUCATION

Post Graduate Diploma in Advanced Computing

Aug 2023 – Jun 2024

Centre for Development of Advanced Computing (CDAC), India | 61%

Coursework: C++, OOP, Linux, OS, SDLC, Agile, Docker, Kubernetes, Jenkins, Selenium, Java, JavaScript, Node.js, React, Redux, SQL, Microservices.

B.Tech. in Computer Science and Engineering

Aug 2018 – Jun 2022

ATS Sanjay Bhokare Group of Institute, Miraj | CGPA: 8.32/10

Coursework: OOP, DBMS, DSA, OS, Computer Networks, Information Retrieval, Image Processing.
